

November 22, 2021

Dear families,

With the change in COVID -19 communication this school year from Interior Health, we wanted to ensure you are aware they are now posting information on the [Interior Health School Exposure website](#). Nakusp Elementary School was added to the IH School Exposure page today for potential exposure on November 12, 15, and 17 2021. Parents and caregivers are reminded that Interior Health, through contact tracing, will determine and follow-up with anyone deemed a close contact. If you have **not** been contacted by Interior Health, please continue to follow current health and safety guidelines, and complete your daily health check.

We are aware that there have been positive cases reported, but due to privacy and guidance from IH we have not been provided with any additional information at this time. IH will be in contact with me if they feel that further action is required, and if that happens I will communicate with the school and the school will provide you with information. We are committed to ensuring that our schools are safe places, and we will continue to do so moving forward.

The safety and well-being of our students and staff are our priority, and if there is anything the school can do to help or support you, please do not hesitate to reach out.

Sincerely,

Peter Dubinsky
